

BUGS REPORT -SITE BUGGY CARS

By Esteban Balvin – ebalvin.ruiz@gmail.com

Bug #1

Summary of Bug: Incorrect validation message of the last name in the registration page

Functional area: Registration page

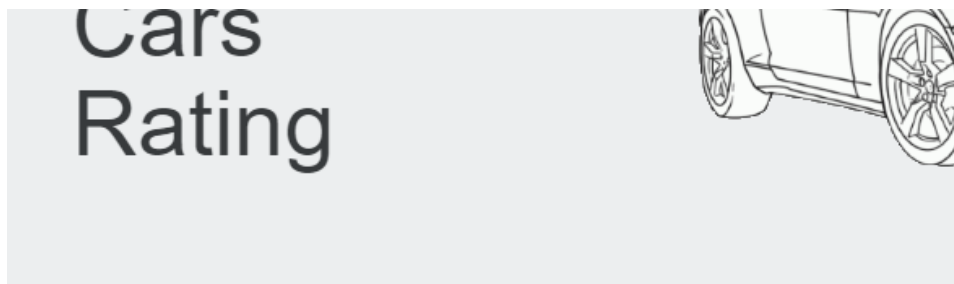

Severity: Low

Steps to Reproduce:

1. Open the site <https://buggy.jsttestit.org/>
2. On the top right corner, click on the button "Register"
3. Fill out login and First name, leave last name empty
4. Check the validation message displayed

Expected Results: The validation message should say "Last name is required"

Actual Result: Registration page shows "Firstname required" incorrectly

First Name is required

Bug #2

Summary of Bug: Incorrect validation message on the password validation

Functional area: Registration page

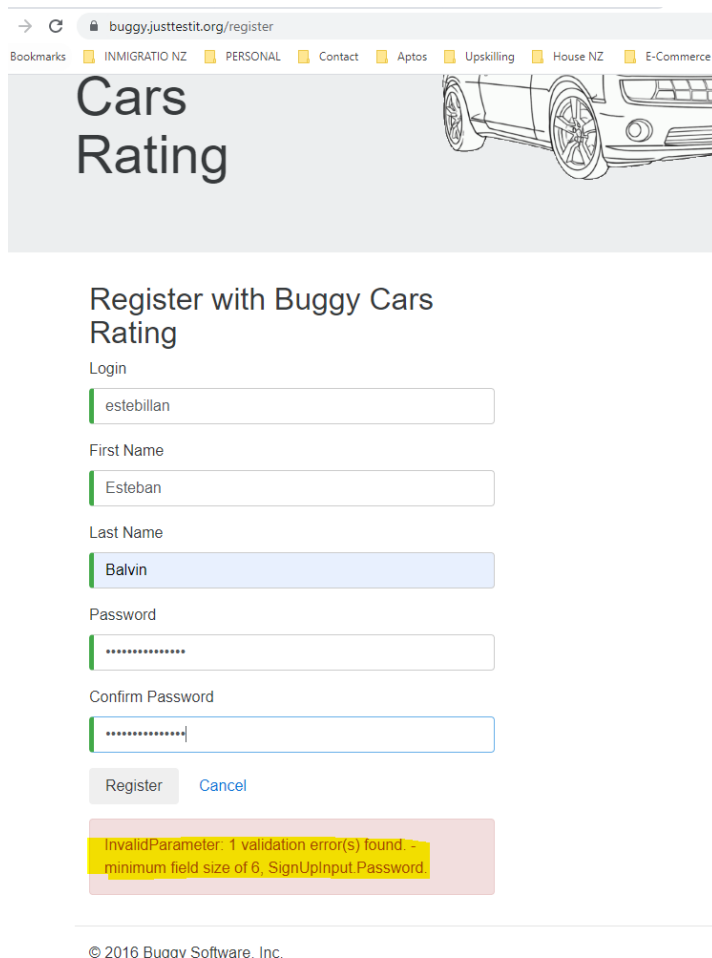

Severity: Low

Steps to Reproduce:

1. Open the site <https://buggy.justtestit.org/>
2. On the top right corner, click on the button "Register"
3. Fill out all fields
4. Set a password with less than 6 characters
5. Click on the button "Register"
6. Check the validation message

Expected Results: The validation message should display a meaningful message so the customer knows clearly what's wrong. For example "Please enter a password with minimum 6 characters"

Actual Result: The message could cause confusion to the customer, it says "Invalid parameter and doesn't clearly say the field where the error is" `SignUpInput.Password` is a technical name and customers might not understand.

The screenshot shows a web browser at the URL `buggy.justtestit.org/register`. The page has a header with the title "Cars Rating" and a navigation bar with links: INMIGRATIO NZ, PERSONAL, Contact, Aptos, Upskilling, House NZ, and E-Commerce. The main content area is titled "Register with Buggy Cars Rating" and contains a registration form. The form fields are: Login (filled with "estebillan"), First Name (filled with "Esteban"), Last Name (filled with "Balvin"), Password (filled with "*****"), and Confirm Password (filled with "*****"). Below the form are "Register" and "Cancel" buttons. A red error message box at the bottom of the form states: "InvalidParameter: 1 validation error(s) found: - minimum field size of 6, SignUpInput.Password." The footer of the page reads "© 2016 Buggy Software, Inc."

Bug #3

Summary of Bug: Home page – navigation link is broken

Functional area: Home page – navigation link is broken

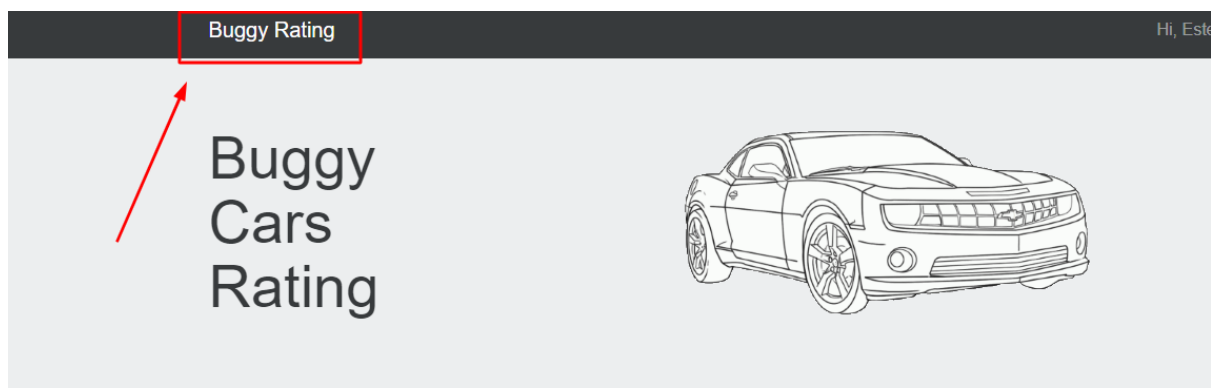

Severity: Low

Steps to Reproduce:

1. Open the site <https://buggy.justtestit.org/>
2. Click on the option “Popular make”
3. On the top left corner, click on the text navigation link “Buggy rating”
4. The page should take you to the home page

Expected Results: The navigation link at the top should take the customer to the home page all the time, same as it does when you are in the Model or Overall Rating pages.

Actual Result: Once the navigation link is clicked in the Make page, the page doesn't do anything..

Lamborghini

Automobili Lamborghini S.p.A. is an Italian brand and manufacturer of luxury sports cars in Sant'Agata Bolognese, Italy. The company is owned by the Volkswagen Group through its In 2015, Lamborghini's 1,175 employees produced 3,248 vehicles.

Ferruccio Lamborghini, an Italian manufacturing magnate, founded Automobili Ferruccio Lamborghini in 1963 to compete with established marques, including Ferrari. The company gained wide fame for the Miura sports coupé, which established rear mid-engine, rear wheel drive as the standard high-performance cars of the era. Lamborghini grew rapidly during its first decade, but sales fell in the wake of the 1973 worldwide financial downturn and the oil crisis. The firm's ownership changed after 1973, including a bankruptcy in 1978. American Chrysler Corporation took control of Lamborghini in 1987 and sold it to Malaysian investment group Mycom Setdco and Indonesian group V'Power in 1994. In 1998, Mycom Setdco and V'Power sold Lamborghini to the Volkswagen Group which was placed under the control of the group's Audi division.

Lamborghini produces sports cars and V12 engines for offshore powerboat racing. Lamborghini produces the V12-powered Aventador and the V10-powered Huracán.

Bug #4

Summary of Bug: One car's image is broken at the Overall page

Functional area: Overall page

Severity: Low

Steps to Reproduce:

1. Open the site <https://buggy.justtestit.org/>
2. Click on the option "Overall Rating"
3. Navigate through all the pages until you see the page 4
4. Identify the car's make "Lancia"
5. See the image displayed

Expected Results: All the car's images should be displayed in the list of models

Actual Result: Image of the car 'Lancia Ypsilon' is broken

Bug #5

Summary of Bug: Sorting by Rank is broken at the Overall page

Functional area: Overall page

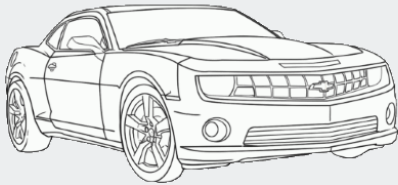

Severity: Low

Steps to Reproduce:

1. Open the site <https://buggy.justtestit.org/>
2. Click on the option "Overall Rating"
3. Once you are at the page, click in the filters at the top of the table
4. Try to order by "Rank":

Expected Results: The order functionality per column should work, desc and asc

Actual Result: Ordering by Rank works incorrectly.

Bug #7

Summary of Bug: User can navigate to non-existing pages beyond the page limit

Functional area: Overall page

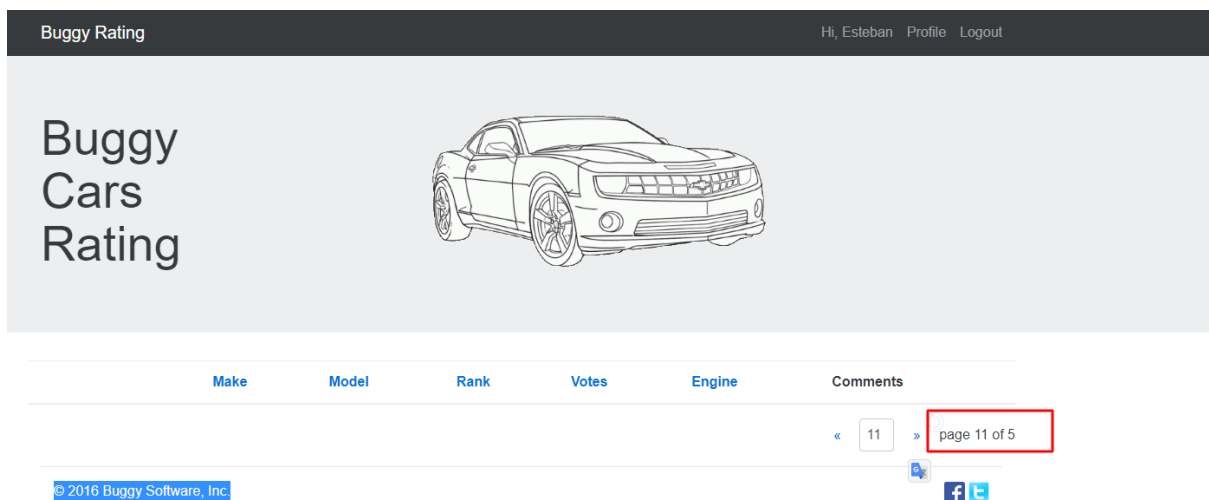

Severity: Low

Steps to Reproduce:

1. Open the site <https://buggy.justtestit.org/>
2. Click on the option "Overall Rating"
3. Click at the page navigater at the right bottom of the page
4. Navigate to the last page 5
5. Keep pressing the forward page

Expected Results: : After the last page, the forward button should be disabled so customer cannot continue

Actual Result: The user can to pages that don't exist like 6,7,8.....

Bug #8

Summary of Bug: Page is not responsive on very mobile due to long comments (IphoneX / Galaxy)

Functional area: Model page

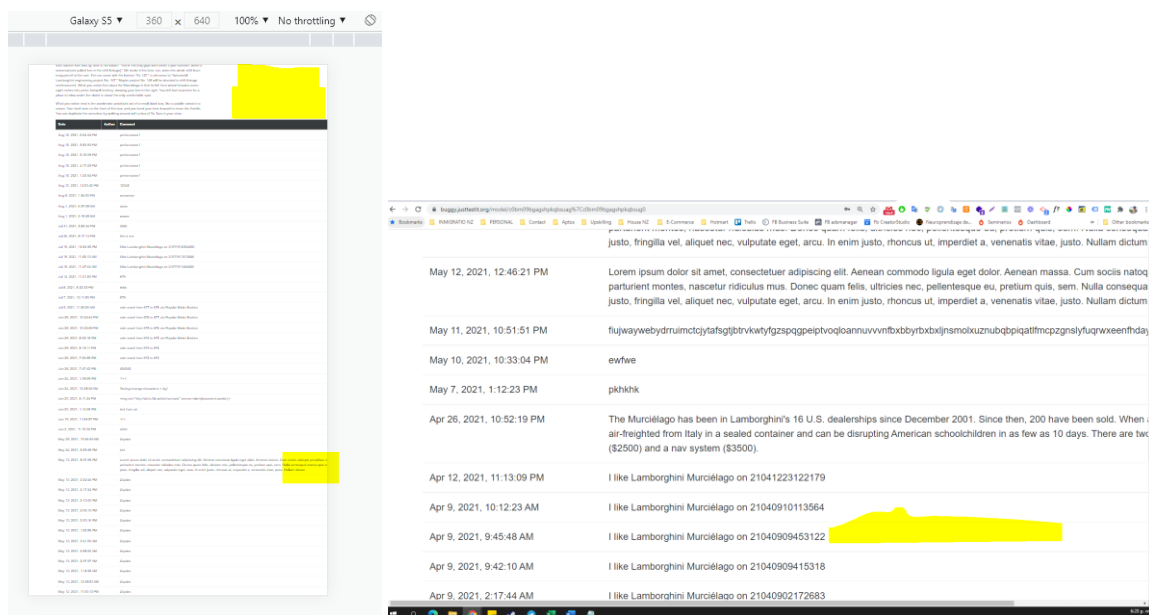

Severity: Medium

Steps to Reproduce:

1. Open the site <https://buggy.justtestit.org/> on a mobile (Iphone X/ Galaxy)
2. Click on the option "Model Rating"
3. Scroll down in order to read the comments
4. Comment with so many words are not collapsed or formatted using multiline

Expected Results: : The page should format the texts so the user don't need to scroll vertically via Browser or Mobile

Actual Result: Comments in the table are not formatted correctly so the user needs to scroll vertically which lead to a poor usability experience.

Bug #9

Summary of Bug: Some Authors at the Model page are not displayed

Functional area: Model page

Severity: Medium

Steps to Reproduce:

1. Open the site <https://buggy.justtestit.org/> on a mobile (Iphone X/ Galaxy)
2. Click on the option "Model Rating"
3. Scroll down in order to read the authors

Expected Results: Since there is a login authentication the app already knows the user voting so the name should be always displayed for all the comments and votes

Actual Result: Some cars do not show the author of the comment posted.

Lamborghini

Thank you for your vote!

Diablo

This last **Diablo** in a decade of flamboyant—some daresay outrageous—sports cars first introduced in 1990 is certainly the best Diablo.

The VT is, curiously, a very high-powered four-wheel-drive beast. Situated amidships is the biggest, baddest V-12 engine we've ever tested in a Diablo. For this 2000 model, Lamborghini has lengthened the stroke by 0.16 inch, lightened the crankshaft, used lighter and stronger titanium connecting rods, and updated the old 16-bit engine-control system to a more powerful 32-bit unit. As a result, peak engine output has been promoted to 543 horsepower at 7100 rpm, 20 more than found in the last Diablo. Torque is up 11 pound-feet to 457 at 5600 rpm.

Horsepower freaks take note: This latest **Diablo** now has more horsepower than four four-cylinder Toyota Camrys.

Mito

The style of the *Mito* lives up to the latest news from the Alfa Romeo family in design, onboard experience and in its performance too.

In this way, the smallest Alfa Romeo sporty car hasn't just grown-up: it has become grandiose.

Strength and agility are Mito's strong points. To provide them, Alfa Romeo engineers worked hard on every element of the car, to ensure only the best performance.

Bug #10

Summary of Bug: Profile page allows to update first name and last name with wrong values (spaces)

Functional area: Profile Page

Severity: Medium

Steps to Reproduce:

1. Open the site <https://buggy.justtestit.org/> on a mobile (Iphone X/ Galaxy)
2. Click Profile
3. Try to update the first name and last name by setting " " (spaces)
4. Click on button save

Expected Results: The site should validate null or spaces are not entered in the required fields

Actual Result: The site allows inputting spaces in the required fields such as First name and Last name.

Bug #11

Summary of Bug: Non controlled exception at the validation of Genders

Functional area: Profile Page

Severity: Medium

Steps to Reproduce:

1. Open the site <https://buggy.justtestit.org/> on a mobile (Iphone X/ Galaxy)
2. Click Profile
3. In the Gender field, type "Malest xc x" or any other value not listed in the dropdown
4. Click on save

Expected Results: The site should only allow the selection of listed values in gender (male, female)

Actual Result: The site allows to type any other value and then once you click save, an "unknown error" is displayed

The screenshot shows the 'Buggy Cars Rating' profile page. The header includes the site name and user information. The main content area is divided into three sections: 'Basic', 'Additional Info', and 'Change Password'. The 'Basic' section contains fields for Login, First Name, and Last Name. The 'Additional Info' section contains fields for Gender, Age, Address, Phone, and Hobby. The 'Change Password' section contains fields for Current Password, New Password, and Confirm Password. The Gender field is highlighted with a red box and contains the text 'Malasd as asdd'. Below the Basic section, there is a red box containing the text 'Unknown error'. At the bottom right, there are 'Save' and 'Cancel' buttons.

Bug #12

Summary of Bug: Wrong validation message when registering new users

Functional area: Registration page

Severity: Medium

Steps to Reproduce:

1. Open the site <https://buggy.justtestit.org/> on a mobile (Iphone X/ Galaxy)
2. Click on Register
3. Fill out the form with the data of an existing user
4. Click on register

Expected Results: The site should validate the login has been created before and should show a clear and meaningful message to the user "Login already exist.."

Actual Result: The site shows an error with a technical message that the user won't understand
